

## Mono-Side Loading/Downloading Machine

{gallery}articoli/caricatricemonolaterale{/gallery}

The basic structure supports a **hydraulic system** with **transposing wheels**. The **wheels** are **electric system**

**Automatic loading/downloading machine**    **vacuum pads**    placed along the    **tilting a**

The movement of the glass sheet is on wheels and gears, and it is placed and "put to zero" automatically

We offer the possibility **to connect** the machine **to other machines** and set

The structure is strong and can resist to sollicitation and sliding even for strong thickness.

Type	Standard Max. Glass Dim.		
Standard Min. Glass Dim.			
Glass Thickness			
Glass sheet placement			
Movement			
Working Height			
CM01	3210x2600 mm		
1800x1500 mm	3-19 mm		
60 seconds ca.			
Oil-dynamic			
950 +/- 20 mm			
CM02	6000x3210 mm	3200x2000 mm	3-19 mm
